APPLE 5 099969 944963 – THE REMASTERED STUDIO RECORDINGS USB BOX SET

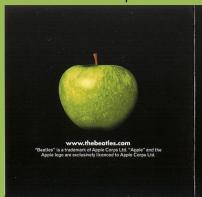

Limited to 30.000 copies

Box bottom

Box left

Box right

This USB memory stick contains pictures, music and video. The music is stored in two formats, high quality 44.1 kHz 24bit FLAC and 320 Kbps MP3. There is a ReadMe file on the memory stick which tells you how to play the FLAC files if you don't already have a FLAC capable media player. The MP3s can be played with the included music player or copied to iTunes using the 'Copy to iTunes' button, found in the music section. If you don't want the files to be copied to your hard disk when adding to iTunes, make sure you have the correct importing settings in iTunes. More details can be found in the ReadMe.

PC USERS:

Insert the drive into your USB port, if the program does not automatically run, go to 'My computer' (or 'Computer' for Vista users) and double click the drive which is labelled 'The Beatles'. From there, double click PC Start.exe.

MAC USERS:

Insert the drive into your USB port, then when the drive is mounted double click The Beatles on your desktop, from there, double click Mac Start.
